

## What Threatens our Water Environment?

Water is the basis of our life. We rely on it for drinking, food supply, energy, transport and as a source of economy, upliftment and recreation.

Yet it is becoming a threatened commodity. Water is the basis of our life. We rely on it for drinking, food supply, energy, transport and as a source of economy, upliftment and recreation. Yet it is becoming a threatened commodity.

The real contributors to water pollution need to be held accountable!

<b>Underground Storage Leakages</b>	<b>Global Warming</b>
<b>Atmospheric Deposition</b>	<b>Oil Pollution</b>
<b>Marine Dumping</b>	<b>Sewage and Wastewater</b>
<b>Radioactive Waste</b>	<b>Industrial Waste</b>

Figure 2.1 Overview of the aquatic nitrogen cycle and sources of pollution with nitrogen

## What can you do?

- Be Legal**
- Participate in public demonstrations/ rallies/parades/mass meetings**
- Write letters of complaint**
- Keep beaches and water clean**
- Check sanitation facilities**

## What does SDCEA do?

The South Durban Community Environmental Alliance works closely with the KZNSF Forum by lobbying for action toward change for a better Durban. As an NGO, environmental justice is the premise of all activity including :

- Advise individuals and organisations
- Arranging rallies, assemblies, boycott's, parades and mass meetings
- Drawing up petitions/pamphlets
- Monitor the status of rivers, dams, oceans and harbours
- Distribute education material
- Organise and mobilise relevant people
- Write legal letters to government
