

Take the Tour in the direction you want!

Feel free to direct the focus of the tour to your group's personal or educational interests. Focus Issues could include air quality, town planning, socio-political, cleaner technology, community involvement, etc, or a bit of each.

The Tour may not take you to all of the Industrial belts. Please let us know if you are interested in visiting any ones in particular.

There is a lot to be discovered about the industrial and environmental set up of this area. One tour is just a start to experiencing the realities of the pressing situation.

Interested in exploring more?

We suggest:

- *Riding the Dragon: Royal Dutch Shell & the Fossil Fire* by Jack Doyle
- Comparison of Refineries in Denmark and South Durban (SDCEA Report 2003)
- Leaking Pipelines: Shell in South Africa
- Clean Fuels (Is it a reality or Myth)
- Community News (SDCEA Newsletter)
- Flaring, GIS and other pamphlets
- Applied Meteorology & Climatology (2004)
- Flaring at oil refineries in South Durban & Denmark (2005)
- Lesson Not Learned Shell (Sapref & BP) in South Durban

What else does SDCEA do?

- Is umbrella organization for 12 local community-based organizations.
- Community monitoring of environmental air pollution and incidents.
- Ensures fair community participation in Environmental Impact Assessments (EIAS).
- Lobbies for community participation in industrial licensing processes.
- Distributes monthly newsletters to the community.
- Facilitates workshops to listen, inform and empower communities; above all encourages people to report incidents to Dbn. Metro on 031 - 361 00 00 and log your complaint. Ask for a log number.
- Also log your complaint at the SDCEA office.
- We act on all community complaints.
- Struggles for access to information and community right to know due to existing Apartheid legislation.
